EDUCATION

Major Specialization in Computer Science (Bachelor of Science)

Western University | London, Ontario

September 2023 – December 2026 (expected)

Relevant Skills: Agile Development, Data Structures and Algorithms, Linear Algebra

Computer Programmer Analyst (Ontario College Advanced Diploma)

Fanshawe College | London, Ontario | CO-OP Program

September 2019 – December 2022 (graduated)

Cumulative GPA: 4.12

Awards: Dean's Honour Roll (6x)

EXPERIENCE

Coding Projects

- **Chip 8 emulator (C++):** Developed an emulator using OpenGL to simulate a virtual CPU and graphics utilizing Object-Oriented Programming.
- **Note-Taking App (Java):** Created an Android application using JSON for data storage. Applied user-centered design principles and agile methodologies to improve app performance and usability.
- **Employee Management System:** Developed a CRUD application in JavaScript, C#, and ASP.net, integrating with a SQL database for real-time employee management. ASP.net library for a C# console application
- **REST API for Store Management (C# & SQL):** Built a store management system utilizing Azure cloud services and REST API integration with an Angular frontend.

Team Projects

- **Pandemic Simulator (Java Swing):** Collaborated with a team to build a graphic-based simulator, applying agile principles to manage collaboration and task tracking through Jira.

SKILLS

- **Programming:** C++, C#, C, Java, React, Angular, HTML, CSS, SQL, Node.js, MSSQL, JavaScript, ASP.net
- **Development:** Agile methodologies, software debugging, device troubleshooting, REST API, cloud platforms (Azure), full-stack development (React, Node.js, Express.js), OOP, game development (OpenGL)
- **Collaboration & Leadership:** Strong interpersonal and communication skills, experience in teamwork, adaptable in fast-paced environments
- **Tools & Technologies:** Git, Office 365, Visual Studio, Android Studio, GitHub

INTERESTS

- **Game Development:** Actively participated in several online game jams.
- **Programming Languages:** Actively learning Rust to expand proficiency in systems programming and memory management.
- **Team Sports/Activities:** Regularly participate in competitive League of Legends and casual basketball
- **Reading:** Keeping up to date with emerging technology trends through tech blogs.
